

# NEVER BREATHE BAD AIR AGAIN

# THE SIMPLEST AIR PURIFIER EVER!

## HOW THE MOUNTAINAIRE WORKS

The air in your home must travel through a filter in order for it to be cleaned with other air "filters". The Mountainaire "purifier" seeks and destroys pollutants in your home. Placed by a cool intake register with the fan set to "On", the ducts can be cleaned as well as shoot super charged oxygen into every room in your home. The Mountainaire has a washable filter and will pick up any small particles that flow through the unit. All other airborne particles will be broken up and drop to the floor to be vacuumed up.

## EASY TO USE

Mountainaire is the easiest to operate air purifier on the market. The filter is made of lifetime quality materials and is easily rinsed out with water. There are no unneeded dials and confusing controls. You can place it in a centralized location and let it go to work for you and your family!

## HOW DOES THE MOUNTAINAIRE ELIMINATE OR SIGNIFICANTLY REDUCE POLLUTION WITHOUT REQUIRING THE AIR TO GO THROUGH THE UNIT?

The Mountainaire has mechanisms that help to eliminate pollution similar to a natural thunderstorm process. Thunderstorms produce highly activated oxygen which destroys pollution and puts negative ions in the air. This activated oxygen produced by thunderstorms is very devastating to pollution and it is also the source of the aroma that you smell after a thunderstorm. You will come home to super fresh air everyday!
